

This story is about a young artist who has lost all motivation for creating and painting after losing years of being trapped in school. One day after class he saw a boy all on his own at a restaurant eating a bowl of soup surrounded by kids with their families enjoying a meal together, after seeing the little boy on his own he decided to go into the restaurant he saw that the boy suddenly disappeared, left confused and standing in the middle of the restaurant he left and when he turned around he saw the boy reappear again then suddenly he realized that the boy he saw was himself when he was younger all by himself with no one around him he then came up with the idea to paint exactly what he just experienced and decided to name the piece back in time and from then on he began painting again until the unimaginable happened....
